## MANAGEMENT DISCUSSION AND ANALYSIS

### INDUSTRY STRUCTURE & DEVELOPMENTS:

India is the one of the world's largest producers of textiles and garments. Cotton and polyester are the major raw materials for India's textile industry. Cotton and polyester together account for around 90% of India's textile mill consumption of all fibres. India's per capita fibre consumption is almost half the global level. Polyester is likely to play a dominant role in capturing the major incremental demand share to bridge this gap. The long term growth and development of this industry is fairly secured because of low base per capita consumption of textile fabric in India as compared to developed countries. In a growing economy with high population, it gets additional support.

However volatility in crude oil prices has impact the growth of the industry. The profit margins of the industry eroded in last two years mainly due to addition of large capacity of Polyester POY and import of Nylon Filament Yarn (NFY). Substantial import duty concessions, under FTAs signed by the Government of India with ASEAN member countries has become the bane of the industry and emerged as a major threat for the Synthetic Fibre Manufacturing Industry. Due to unstable international and domestic economic scenario, company has suspended its yarn manufacturing activity and proposes to expand its Textile trading activity with the approval of the Shares Holders.

### SWOT ANALYSIS:

During the year under review, company has suspended its yarn manufacturing activity due to heavy losses incurred during the previous years. Company have regularly reviewed the market condition of the yarn manufacturing industry in India and directors of the company are of the view to permanently discontinue its manufacturing activity and concentrate on its textile trading activity, with the approval of the share holders.

### OPPORTUNITIES & CHALLENGES

#### Opportunities

- (i) Rapid urbanization, rising working population, an increase in disposable incomes and increasing affordability vehicles are driving demand in downstream industry
- (ii) Per capita consumption of Polyester in India is exceedingly low by world standards so there is a great scope for local demand.
- (iii) Rural market will play important role in the economy which offers a major opportunity growth in the Polyester industry.

#### (iv) Fast changes in fashion design, growing exports of textiles Challenges

- (i) Unfavorable Exchange rate fluctuation
  - (ii) International competition especially from China
  - (iii) Inconsistent raw material supply
- (iv) Volatile and high raw materials prices due to middle-east crisis
